"FILLED" CHEESE.

Complaints from the Liverpool Provision Trade Association and Exchange Company.

The Gazette is in receipt of the following communication from Hon. H. C. Thom, Dairy and Food Commissioner, which is published for the benefit of all interested:

To the Editor,

MADISON, April 15, 1899.—Enclosed please find a circular which came to my address from the secretary of the Liverpool Exchange Company. I think the matter demands the attention from the friends of one of the greatest industries of the northwest.

A circular was received at this office from the same source which stated that the Liverpool docks were covered with "filled cheese" from the states of Ohio, Illinois and Wisconsin. The market for cheeses from these states could not escape receiving a black eye. Until we can establish and maintain a demand for our goods upon merit this ban from foreign as home countries will continue to exist.

Very truly yours,

H. C. THOM.

(THE CIRCULAR.)

SECRETARY'S OFFICE, 24 NORTH JOHN STREET, LIVERPOOL, MARCH 25th, 1899.

DEAR SIR,—We desire to inform you that a committee consisting of the undersigned has been appointed by this association (the Liverpool Provision Trade Association and Exchange Company, Limited) to watch the interests of the cheese trade, which are being seriously menaced by the continued increase in the manufacture of the article known as "filled" cheese.

We desire to co-operate with you in the direction of obtaining such legislation as will lead to the suppression of the manufacture of "filled" cheese.

The legitimate interests of the "Trade" are seriously imperilled, and the reasonable expectation of the consumer disappointed, and we are clearly of opinion that the distribution of "filled" cheese is a disgusting the British public with the pure article, and that our Trade and mutual interests are in danger of suffering permanent and lasting injury.

We are in communication with our Home Sanitary Authorities, and are placing the matter before our agricultural government department, and members of the house of commons.

We want to suggest that you shall call upon your government and state legislature to prohibit the manufacture of these goods.

We would ask you to inform us what steps are being taken on your side, and to accept of them in your opinion, and to write to bring about the end we have in view. We await the favor of your reply.

Yours faithfully,

W. CARSON, J. W. DUNN, J. L. GRANT, C. H. HOLLAND, T. LONSDALE, SAMUEL WHITE.

Secretary, J. R. HARMON BANNER, To H. C. Thom, Madison, Wis.

THE LILLY OF THE ROCK.

A New Steamboat Launched This Afternoon.

This afternoon another steamer was added to the Janesville fleet. Our city can now boast of quite a navy. For boats two masted wheelers and two propellers. The "Enterprise," the "Mayflower," Ray Bump's private steamer, and the new "Lilly of the Rock." The last named is the new addition and she was formally launched and christened this afternoon. Her dimensions are: Length, thirty-two feet; beam, nine feet; depth, four feet. The engine and boiler will be five horse power, and will propel her through the water at a good rate of speed. It is a flat-bottomed boat, and is operated by side wheels. The owner is Mr. Frank Metzinger, one of the foremen at F. M. Maniff & Co's shoe factory. The designer and builder is Mr. Emory Parks and he has done his work well. Mr. Parks will be captain of the new boat during the coming season. The boat is intended for the use of camping, picnics, and fishing parties, as the owner will not run a park in connection with the boat. It will be able to ascend the river as far as Indian Ford, as very shallow water will suffice to float her.

PULLED UP A RAIL.

The Milwaukee Train Meets a Small Accident.

The Milwaukee train on the Chicago Milwaukee & St. Paul Railroad, met with a small accident this morning. As they were pulling out, the break beam on the engine became caught in a rail of the street car railroad at the Academy street crossing. The rail was torn up and twisted about like a straw. The train was stopped as soon as possible and an examination of the engine made. It was found that a brake beam on the engine was broken, but no other damage done. After trying the air-brake and satisfying themselves that that important part of the machinery was unimpaired, the train wended on its way.
